

When using Docker to manage containers, it is important to be able to keep the Docker engine up-to-date. In this lesson, we will discuss the process of both downgrading and upgrading the Docker engine.

## Relevant Documentation

- <https://docs.docker.com/install/linux/docker-ce/ubuntu/#upgrade-docker-ce>

## Lesson Reference

Downgrade to a previous version:

```
sudo systemctl stop docker
sudo apt-get remove -y docker-ce docker-ce-cli
sudo apt-get update
sudo apt-get install -y docker-ce=5:18.09.4~3-0~ubuntu-bionic docker-ce-cli=5:18.09.4~3-0~ubuntu-bionic
docker version
```

Upgrade to a new version:

```
sudo apt-get install -y docker-ce=5:18.09.5~3-0~ubuntu-bionic docker-ce-cli=5:18.09.5~3-0~ubuntu-bionic
docker version
```
